

Policy on Suspension, Withdrawal or Reducing Scope of Certification

CeSP will suspend, withdraw or reduce the scope of certification of its clients under conditions such as:

- The certificate holder does not allow surveillance or recertification audits to be conducted at the required frequency.
- The client's certified management system has persistently or seriously failed to meet certification requirements
- Does not comply with the requirements of Policy for Use of Certification Mark (P-06)
- The certificate holder has voluntarily requested a suspension or reduction in scope

Failure to resolve issues that have resulted in the suspension in a time established by CeSP will result either in withdrawal or reduction in the scope of certification. In case of suspension, withdrawal or reduction in scope of certification, the client status would be published.
